Multimedia Touch Screen

Description

Legrand’s brand-new and innovative Multimedia Touch Screen enables you to control all the highly-advanced functions of your My Home Legrand system through a simple and attractive icon-based graphical interface and 10” 16:9 LCD Touch Screen. As well as manage your entire home automation system, you will be able to answer calls on the video door entry system and view images from your external video door entry system cameras. Thanks to its USB and SD card ports, you will also be able to listen to your favourite music on your sound system, as well as to view videos and photographs. Plus, if your system is part of a LAN network with flat-rate broadband connection, you will be able (through simple icons located on the home page) to receive RSS services, such as news and weather forecasts, to view webcam images and to listen to the radio via the Web.

6. Port for Sound System source output
7. RJ45 connector for Ethernet connection
8. LAN connection LEDs
9. PSTN telephone line port (future application)
10. Video 2 wire SCS BUS port
11. Power supply 1–2 port
12. End-of-line ON/OFF micro-switch
13. Stereo loudspeakers
14. Bracket fastening screw
15. Factory settings reset pushbutton
16. Battery compartment
17. RS232 port for PC connection
**Configuration**

For the configuration section, the product is programmed by connecting it to a PC using the interface cable 492 34, the USB/USB mini cable or LAN cable and the appropriate software MultimediaTouchScreenConfig. MultimediaTouchScreenConfig software: it creates a link between the preconfigured icons, which will be shown on the Display, and the functions that must be managed and implemented by the devices of the Automation system, Sound System, Burglar Alarm, Temperature control, video door entry system and multimedia.

The program may also be use to configure extra functions inside Touch Screen, such as scenarios with logic or time parameters, time based activations, time and date display, the setting of a protection password and the update of the firmware version. It is also possible to define the graphic style of the icons to complement the design of the device. For further information refer to the software documentation available with the device.

**Installation**

Installation flush to the wall with appropriate bracket. To be finished by the appropriate surround plate.
