Classe 300EOS with Netatmo
touch screen handsfree video internal unit
with Wi-Fi

344842 - 344884

alexa | built-in

Description

2 wires/Wi-Fi handsfree connected video internal unit with built-in* Amazon Alexa® voice assistant, 5" vertical touch screen LCD display and video door entry answering machine.

It has a physical key for door lock release and capacitive keys for the control of the main video door entry functions: handsfree communication, entrance panel activation / camera scrolling and Favourite key (can be configured to activate the quick actions most frequently used – e.g. additional door locks, staircase light control, intercom). There are notification LEDs for: Wi-Fi network connection status, info / notifications and call exclusion.

It is possible to easily interact with the built-in Alexa® voice assistant, either using the dedicated capacitive keys or with your voice, and activate several functions, such as the video door entry functions, smart home, scenarios, reminders etc.

Using the touch display, it is possible to access the notification list, as well as your favourite door entry, security and Smart Home controls. The Home Page contains Smart Home function panels that allow to simultaneously control all the lights, shutters and fancoils of the house or individual rooms, to manage the thermostats and display the energy consumption of the home. Possibility of voice communication with the switchboard - if present in the system - after a specific call.

The device must be configured by physically connecting the configurators, or using the menu, which will give better possibilities of customisation of associated functions and texts. Thanks to the Wi-Fi connection, you can associate the video internal unit to the Home + Security App (available for Android and iOS). The App allows to use the main video internal unit functions (receiving calls, door lock release, display of the event timeline and activation of the entrance panel/camera cycling). With the Home + Security App, it is also possible to manage the products of the Netatmo Security range (outdoor and indoor cameras, door and window sensors, indoor siren, smoke detector). This allows you to quickly and easily create a Smart security system.

The device also allows to create and manage MyHOME BUS SCS solutions, without the need for adding dedicated gateways. The installer can configure the MyHOME system using the Home + Project app. Users can manage their homes: remotely with the Home + Control App, using the display interface and with Alexa® and Google® voice commands.

Wall mounted installation using the supplied bracket Possibility of Wi-Fi connection or using RJ45 ethernet cable with the dedicated accessory 344844.

(*) Alexa® is not available in all languages and all countries. The features and functions of Alexa® may vary depending on location.

Related items

344844   Accessory for connections using the ethernet cable RJ45
346020   Additional power supply

Technical data

Operating temperature:	5 – 40 °C
Power supply voltage from BUS-AV:	21 – 27 V
Additional power supply from 1-2:	27 V
Maximum BUS-AV absorption in operation:	580 mA
Maximum BUS-AV absorption when powered by clamp 1-2:	22 mA
Maximum cable section for each clamp:	2 x 1 mm²
Maximum distance to be able to use Alexa®:	5 m in optimum ambient audio condition

Wireless device in compliance with 802.11b/g/n standard, supports 2.4 GHz Wi-Fi band; transmission power < 20 dBm. WEP/WPA/WPA2 safety protocol.

Minimum connection speed of 512 Kbps (0.51 Mbps) for streaming music and other content through Alexa®

Configuration

MyHOME Smart Home Configuration
The MyHOME Smart Home system must be configured using the Home + Project App available for mobile and desktop devices.
Home + Project makes it possible to design the entire system, configure all the associated devices and finally deliver the functioning system to the end customer (who will still have to complete the commissioning using the Home + Control App).

Home + Project can be downloaded from App Store

App Store   Google play
Download Home +Project App

or by logging on to https://homeproject.legrand.com site for the desktop version.

Video door entry system configuration using the menu
It is possible to configure the device using the appropriate menu (see the Installation and configuration manual).

Video door entry system physical configuration
Alternatively, it is also possible to use physical configurators as shown below.

M	P	N

MM = Mode of operation according to the tables on the following pages.

PP = Address of the EP of which you can open the Door Lock with Handset idle, and to which you can send the auto-on command.

NN = Device address.

alexa | built-in

Physical configuration

M	P	N
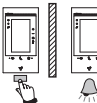

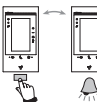

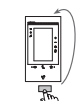

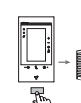

The functions that can be attributed to the Preferred key (⭐) using the physical procedure configurator inserted in the MM - (units) socket are the following:

M	P	N

The MM (tens) physical configurator defines which 4 actions can be completed from the EDIT FAVORITES menu. The possible configurations are shown in the following table.

MM = **0**   Staircase Light Control

NOTE: In case of several Classe 300EOS with Netatmo units installed in the same house, only one will be able to use the MyHOME Smart Home functions.

NOTE: Classe 300EOS with Netatmo:
- is not compatible with the HOMETOUCH device. The HOMETOUCH device is only compatible with MyHOMEServer1.
- is not compatible with the temperature control solution with 99-zone central unit 573918, 573919, 067456, 3550.
- is not compatible with devices configured using physical configurators.

Wiring diagrams

Below are some examples of connection of the Classe 300EOS with Netatmo 344842/344884 video handset in single family and multi-family 2 wire video door entry systems.

DIAGRAM 1 - EXAMPLE OF MULTI-FAMILY SYSTEM
NOTE:
• Additional powersupply is mandatory
• Classe 300EOS with Netatmo has to be installed only in installation tottally 2wire technology
• For other system particularities, refer to the technical guide

alexa | built-in

DIAGRAM 2 - EXAMPLE OF ONE-FAMILY SYSTEM WITH POWER SUPPLY AND WITH AUTOMATION BUS

NOTE:
• Additional powersupply is mandatory
• Classe 300EOS with Netatmo has to be installed only in installation tottally 2wire technology
• For other system particularities, refer to the technical guide
• In case of several Classe 300EOS with Netatmo units installed in the same house, only one will be able to use the MyHOME Smart Home functions
• The Classe 300EOS with Netatmo is not compatible with the HOMETOUCH device. THE HOMETOUCH device is only compatible with MyHOMEServer1

DIAGRAM 3 - EXAMPLE OF MULTI-FAMILY SYSTEM WITH POWER SUPPLY AND WITH AUTOMATION BUS

NOTE:
• The additional power supply is mandatory
• Classe 300EOS with Netatmo must be installed only in systems completely made with 2 wires technology
• For other system particularities, refer to the technical guide
• In case of several Classe 300EOS with Netatmo units installed in the same house, only one will be able to use the MyHOME Smart Home functions
• The Classe 300EOS with Netatmo is not compatible with the HOMETOUCH device. The HOMETOUCH device is only compatible with MyHOMEServer1

Main functions

From the Home Page of the device, it is possible to access the main functions, as described below:

A   B   C

G ⚙   19:32   📶

Dashboard

💡 Lights   ▯▯ Shutters

F   🌡 Thermostats   ✶ Fans

🏠 Energy 842W

Favourites   SHOW MORE — D

E   📼 Voicemail ●   🔔 Ringtone ●

A   **Current time**.

B   **Notifications**: it displays different types of notifications.

C   **Network connection status**.

D   **Favourites**: it opens the section containing the video door entry objects and the MyHome objects that activate the corresponding functions.

E   **Video door entry Favourites highlighted, by default**:
– Ringtone Exclusion: it mutes the ringtone in case of call.
– Answering machine: records unanswered entrance panel calls.
It is possible to customise the favourites highlighted, by adding them in the Home Page area, in the section "**Add an object to the favourites**".

F   **MyHOME function panels**: this area displays some of the MyHOME functions available for controlling the home.
Function panels will only be visible if the installer has included at least one of the objects relating to the function. (e.g.: the light panel will only be visible if the installer has configured a light object).

G   **Settings**: it opens the menu used to customise the functions and thus make the most of the device.

The video handset offers the possibility to select among 6 types of bells with programmed ringtones, which can be freely associated to the following type of calls:

Call from the entrance panel (configured with S=0)

Call from the entrance panel (configured with S=1)

Call from the entrance panel (configured with S=2)

Call from the entrance panel (configured with S=3)

Intercom call within the apartment

Intercom call outside the apartment

Floor call

The association of the type of ringtone to the event is performed using the dedicated menu on the device.

Using the advanced configuration, the video handset gives the possibility of programming up to:

50 generic activations

50 direct activations to the door locks

40 intercoms within the apartment

40 intercoms outside the apartment

50 direct auto-switching on to the EP

Video door entry answering machine

The video door entry answering machine allows (if enabled) to display a video message recorded by the visitor.
It is also possible to record an audio message to play back on the entrance panel in case of unanswered call.

Intercom function

The intercom function allows for up to 3-minute communication between and among video door entry systems in the same apartment / in different apartments.

Door state function

This function indicates the status of the door lock (only for systems preset with appropriate actuator). If open the „door lock LED" flashes, and if closed, the LED stays off. The function cannot be activated together with the Office function.

Office function

The Professional Studio (Office) function gives the possibility of setting the automatic opening of the door lock in case of call from the Entrance Panel. It cannot be activated at the same time as the Door Status and Safe Door Lock functions. The door lock key flashing (⚷🔘) indicates that the functions is active.

MyHOME Smart Home Functions

MyHOME function panels

MyHOME function panels allow to simultaneously control all the lights, shutters and fancoils of the house or individual rooms.
It is also possible to manage thermostats and display the energy consumption of the home.

Simple program

This mode can be used to set different "Day" and "Night" band temperatures.
Example: Set a temperature of 21.5° from 7 a.m. to 10 p.m. and a temperature of 19.5° from 10 p.m. to 7 a.m

MyHOME functions

After the installer has configured the objects in the various rooms and the user has placed them in the Favourites section, it is possible to control the home, for example to switch on the lights or operate the shutters, etc...

MyHOME Function Table

💡	**Light** Switch a light on and off, or adjust its intensity.	**Colored light** If the system includes a coloured light (coloured Philips Hue* and Lifx* Enttec ODE* LED lamps), it is possible to adjust its intensity and view its status. 💡
🪟	**Blind** Adjust the opening and the closing of the shutters.	**Socket** Control the load connected to a controlled socket. 🔌
▤	**Towel warmer** Switch the towel warmer on and off.	**Lock** It opens a door lock. 🗝
▤	**Shutter** Adjust the opening and the closing of shutters, rolling shutters and garage door.	**Scenarios** Executes the scenarios set by the installer. ▶

*The device may not be compatible with some models or their firmware versions.
